ASSEMBLY

There may be polish marks on the fan blades. This is not a defect or sign of poor quality, it is intentional and is done to balance the fan blades, to reduce noise and stress on the motor.

- Fit pedestal tube onto round base and secure with the plate and large securing bolt that fits through the bottom of the base of the fan. Ensure this is fully tightened as shown below. Fit cover ring over the join on the round base.

- Install the Fan Head (Motor) on the female support of the Pedestal Tube using Locking Screw supplied (Figure 1).

- Fit rear guard of fan onto motor and secure with 4 screws. Please ensure these screws are properly tightened to avoid vibration noise. Ensure bolt hole in outer rim is at the bottom.

- Fit blade to shaft and Lock blade set screw by ensuring the screw seats onto the flat part of the shaft as shown below.

- Fit front guard to rear guard using clips. Hang Front Guard by its Hook over the top of Rear Guard. Ensure that clips on Front Guard are open to fit onto rear guard. Align the Locking Screw holes which should be at the bottom, and close clips. Secure the screw and nut by tightening up, see (Figure 2) below.

- **SPEED FUNCTION**

This industrial design pedestal fan has 3 speeds for your comfort and convenience

- 1 - Low speed
- 2 - Medium speed
- 3 - High speed

0 - Off to stop the fan working

- **OSCILLATION**

Press red ON/OFF switch on the top of motor housing to make the fan head oscillate. To stop this, switch the ON/OFF switch OFF.

CLEANING AND MAINTENANCE

- The appliance, the power cord and the power plug must not be immersed in water or other liquids when you are cleaning them. Clean them with a dry cloth.
- If it is very dirty, the outside of the appliance can be wiped carefully with a moist cloth and then dried carefully. Make sure that no moisture penetrates into the interior of the appliance.
- Do not use any harsh cleaners, steel brushes, scouring powder or other hard objects to clean the appliance as these can cause scratches on the surfaces.
- To clean the fan blades, the front guard can be removed. The front guard must be placed back into place, and secured properly before using the fan.
- The fan can also be cleaned using the small bristle nozzle of a vacuum cleaner taking care not to damage the fan or blades.
- Clean the appliance regularly.
- Never use solvents, benzene or oil-based cleaners as this can damage the housing, fan guards and fan blades.
- Re-tighten visible screw connections on the appliance regularly in order to ensure that the device is functioning properly.

Before cleaning the fan, always remove the plug from the power socket to prevent injury or electric shock.

DISPOSAL

Used electric appliances

If you do not require to use your electrical appliance any longer, dispose of it at a recycling depot for used electric appliances.

Used electric devices must not be disposed of with normal household rubbish.

Further disposal instructions:

Return the electrical appliance in such a condition that its later re-use or recycling is not adversely affected.

If applicable, batteries must be removed in advance and the destruction of parts which contain fluids must be avoided.

Electrical appliances can contain harmful substances. Improper handling or damage to the appliance can lead to health problems or water or ground contamination, when the appliance is recycled later.

TROUBLE SHOOTING

If the fan does not operate	Confirm the fan's switch is not in the off position
	Check that the fan is plugged into the wall socket and the wall socket is switched on.
